

The screenshot displays an IDE environment with the following components:

- Top Pane (Source Code):** Shows the `BankingApplicationTests` class. The code includes package declarations, imports for `org.testng.Assert`, `java.util.ArrayList`, `java.util.List`, `org.junit.jupiter.api.MethodOrderer`, and `org.junit.jupiter.api.Order`. The test method `performUserLogin()` is highlighted.
- Bottom Pane (Console Output):** Shows the output of the application's startup and test execution. It includes the Spring Boot logo, version information (v3.2.2), and a detailed log of the application's startup process, including the initialization of the JPA EntityManagerFactory and the HikariPool. The log also shows the execution of the test method `performUserLogin()` and the resulting database insertions.
